

The Open Standard For Blockchain Credentials

Blockcerts is a new initiative by the Ministry for Education, Sport, Youth, Reasearch and Innovation (MEYR) to give Maltese students lifelong ownership of their digital credentials. Blockcerts is a way to verify official records using a blockchain. Once you receive your Blockcert, you own it for life. You can share it with anyone you choose, like an employer when you are applying for a job. No matter where in the world you go, sharing and verifying your credential is instant and for free.

To receive your Blockcert from Mikiel Anton Vassalli College (MAVC) - The National College for the Visual and Performing Arts Education:

- Download the free Blockcerts Wallet app on your mobile device.
  Your Wallet is private, and no one has access to it but you.
  Remember to back up your Blockcerts secret passphrase!
- Look for an email indicating your digital credential is ready.

  Download your credential which is attached within such email in JSON format and store it in a safe place. If you don't receive such an email by your graduation date, contact us at credentials.mavc@ilearn.edu.mt
- Click the green "Import" button in the email to import your credential into your Blockcerts Wallet for easy sharing and verification!
